Growth and content marketer with 10+ years across financial services, SaaS and Web3, with a growth hacking and go-to-market backbone that shapes how I run social and content. I started in banking (HSBC, Bradesco Seguros) and grew into leading content, social media and campaigns for tech and fintech brands. I turn complex, technical topics into clear content that builds audience and pipeline, and I use AI across research, writing and video to move fast without losing a human voice.

CORE SKILLS
